≡formistica

Formistica is radically simple software that helps you replace wasteful paper forms with dynamic electronic forms on your desktops, tablets and mobiles. Our cloud-based software provides a fast and versatile way to tame your organisation's forms and data and integrate your business processes. Formistica will help you collect data, photos, and signatures online or offline and quickly and easily transfer form data collected into your own systems.

Simple & Flexible Form Design

Build and use electronic forms quickly and easily

- Simple form building from a wide variety of form fields including text, dates, numbers, RAGs, attachments, custom lists
- Capture signatures on a form
- Capture photos and annotate
- Capture image sketches on existing or captured photos
- Use sub forms to capture "parent-child" form data (one-to-many)
- Use lists to standardise on data capture
- Include mandatory fields and default data
- Copy Forms and Form Fields for quick and easy form design

Painless Data Collection

Use any tablet or mobile device with a web browser to capture data

- No app to install or update just a web browser is required
- Form data can be captured online or offline (where there is no Wi-Fi or mobile signal)
- Offline data collection and then sync when you're online
- Changes to forms can be instantly deployed to all your users
 - Automatically capture GPS position of form data collection

Integrate Forms With Your Business Processes and Systems Integrate data collected into your own CRM, ERP and applications.

- Define one or more "form actions" to email or upload form data collected
- Form submissions can be transferred as soon as its collected or consolidated on a daily or weekly schedule
- Integrate with your own systems using SQL Server, Reporting Services, Dropbox, Google Drive or FTP or our flexible API
- Design form templates in Microsoft Word or Excel to customise form data export
- Import data from your CRM, ERP and applications into field lists and automatically refresh

Organise and Streamline Form Data Collection

Simple and flexible tools for managing form data collection.

- Define form "target groups" to organise which users have access
- Forms data can be collected as a one-off or an ongoing basis
- Organise your forms into Form Groups
- Organise your users into User Groups
- Use conditional logic to control field visibility and initial form data
- View and export form data as soon as its collected including photos, signatures and GPS map location
- Form data can be automatically emailed or transferred as Microsoft Word, Microsoft Excel, PDF, CSV, XML, JSON, Reporting Services

Cost Effective

Low-risk commitment with a monthly subscription

- Software is available as a service (SaaS)
- Monthly subscription without initial investment
- Access to experienced help, training and support
